

Side protection whenever you need it

The attractive Paravento side screen provides protection from peering looks, the sun and the wind, and it also stands out for its *good looks*

Attractive privacy

Create your own elegant private surroundings in next to no time

Even if you are on the best of terms with your neighbours, you still might want to enjoy your own privacy from time to time and not have to worry about people peering in. The **Paravento** side screen is a particularly attractive and practical solution. As everything at weinor comes from one and the same source, your **Paravento** perfectly matches all other products.

Choose from a broad selection of colour shades and fabric patterns!

**Matching designs:
wonderful fabrics**

Combine the wide range of frame colours with over 140 exquisite fabric patterns from weinor's "moments" fabric collection.

**weinor awnings with
a big choice of colours**

Choose from 47 standard frame colours, 8 scratch-resistant and robust trend colours as well as another 200 special RAL colours for your awning.

weinor fabrics, with their high quality workmanship and tear-resistance, are noted for their exceptionally long lives. Special finishing processes also make them particularly UV resistant. Use of the latest nano-technology gives weinor's fabrics exceptional dirt- and water-repellent properties.

We also offer an additional WeiTex polyester fabrics. These fabrics display outstanding elasticity and memory effect. The result: significantly less creasing and wrinkling and very good fabric positioning.

Exactly the right colour shade

Colour coordinate the **Paravento** with the walls of your house, or on the door shutters, as shown in the example.

Technical details	Paravento (with seamless cover)	Paravento (with sewn cover)

We offer the very highest quality

Weinor puts a lot of emphasis on quality, from the design and materials to workmanship, mounting and service, so you can enjoy your Paravento for a long time.

Create privacy quickly and easily

Easy to use

Side blinds provide protection from the sun, glare and the wind. They also give you undisturbed privacy. The fabric, which is stored securely in a cassette, is unrolled and retracted easily. In winter, the cassette can be removed easily.

Installation

Two casing brackets are all you need to install the **Paravento** directly on a house wall, a patio roof support or similar construction. On the opposite side, the **Paravento** only requires one or two handles and a grip bracket at

the same height as the casing. When the side screen is unrolled, the handle inserts into this grip bracket.

The grip bracket can be mounted on a wall or alternatively on a slot-in post or screw-in post. The post itself can be anchored to the patio floor or in a bed of concrete.

Longevity

We don't cut corners on the big or small parts: All our small parts such as screws, nuts and bolts are of stainless steel so they will last an especially long. All other parts are powder coated in an elaborate process. This makes them both impact and scratch resistant.

Perfect and simple installation

Rediscover your patio

▲ weinor awnings

Your dream patio at any time of year

▲ weinor conservatories

No matter what you want to use your patio for, weinor has the right product for you – awning, patio roof, Glasoase® and conservatory

As an experienced specialist, your weinor dealer will help you throughout the process, from planning to completion. They will help make your patio dreams come true and will support you with advice and help. That way you stay on the safe side at all times.

Important Informations:

For textile sun protection: Creases can form in the fabric and when folding the awning cloth. That can lead to the areas of the fold appearing darker when seen against the light, particularly with light colours. Folds in the fabric in the areas of the seam, border and panels can be caused by multiple layers of fabric and different diameters of rolled up fabric. The stresses in the fabric caused by this can lead to rippling (e.g. waffle or fish-bone shapes). This is normal to differing degrees with nearly all awning fabrics. Creases and folds in the fabric do not reduce the awning's value or its suitability for its purpose. Awnings and conservatory blinds are for protection from the sun and should be rolled up in rain

and strong winds. Wet fabric creases more easily and as far as possible should only be retracted after drying out (please take care in strong winds and avoid the formation of puddles). Depending on the colour of the ordered frame we supply all small parts as well as crank handles and drives for units with crank mechanisms in black (similar to RAL 9005), white (similar to RAL 9016) or grey (similar to weinor 7319).

For patio roof, Glasoase®, conservatory: contact a qualified conservatory builder for information on the causes of condensation and occasional cracking noises, and on how to avoid these from the outset during the planning stage.
